Summary

CompTIA Security+ certified IT professional with Tier 1/2 support experience across helpdesk operations, Active Directory administration, and Microsoft 365 environments. Skilled in ITIL-aligned incident and service request management, endpoint support, network and VPN troubleshooting, and remote-support tooling. Builds on formal support experience with hands-on cybersecurity fundamentals through TryHackMe, with a focus on service desk and security-adjacent IT roles.

Experience

Monarch Industries Limited <i>Store Operator</i> - Managed inventory records and maintained accurate stock levels to support efficient daily warehouse and store operations. - Received, inspected, and organized incoming shipments, verifying quantities, damages, and shipment accuracy against purchase orders and company standards. - Conducted regular inventory counts and updated stock records in database and spreadsheet systems to minimize discrepancies and prevent shortages.	September 2025 – Present <i>Winnipeg, Manitoba, Canada</i>
Ontario Power Generation (OPG) <i>IT Support Specialist</i> - Provided Tier 1/2 support for Windows workstations, Microsoft 365, Outlook, Teams, printers, VPN access, and account authentication, triaging incidents through ITSM workflows. - Administered Active Directory user accounts, including provisioning, password resets, group membership, and basic Group Policy troubleshooting. - Used remote-support tools to diagnose and resolve endpoint issues without onsite intervention, and leveraged AI-assisted tools (Microsoft Copilot) to speed up troubleshooting and documentation. - Created knowledge-base articles and resolution notes to improve first-contact resolution, following ITIL-aligned incident and change-management practices.	January 2025 – September 2025 <i>Ontario, Canada</i>
Durham College <i>IT Support Technician</i> - Provided Tier 1/2 support resolving hardware, software, and networking tickets for staff and students. - Supported Microsoft 365 issues including account access, application errors, and licensing. - Recorded, tracked, and triaged service requests in a ticketing system, achieving a resolution rate 20% above company target.	May 2024 – October 2024 <i>Ontario, Canada</i>

Education

Durham College <i>Postgraduate Degree, Computer Systems Technician</i>	January 2023 – October 2025 <i>Ontario, Canada</i>
Gujarat Technological University (GTU) <i>Diploma of Education, Computer Engineering</i>	September 2019 – June 2022 <i>Gujarat, India</i>
