SUMMARY

CompTIA Security+ certified IT professional with enterprise support experience and a focus on security operations. Skilled in Windows, networking, Okta, and Microsoft Intune, with exposure to incident handling, security compliance, and log analysis.

EXPERIENCE

Monarch Industries Limited

Store Operator

September 2025 – Present

Winnipeg, Manitoba, Canada

- Managed inventory records and maintained accurate stock levels to support efficient daily warehouse and store operations.
- Received, inspected, and organized incoming shipments while verifying quantities, damages, and shipment accuracy against purchase orders and company standards.
- Conducted regular inventory counts and updated stock records in database and spreadsheet systems to minimize discrepancies and prevent shortages.

Durham College

IT Support Technician

April 2024 – September 2025

Ontario, Canada

- Provided first-contact support via a Live Chat Support pilot on Microsoft Teams for clients using Azure Virtual Machines, later taking on first-level support for all Azure VM tickets.
- Managed Active Directory and Group Policy, including password rotation policies and application control, alongside physical and virtual server security to keep company networks and apps running reliably.
- Recorded, tracked, and triaged service requests and incidents in a ticketing system, resolving complex client requests involving access provisioning; achieved a resolution rate 20% above company target.
- Wrote PowerShell scripts to automate daily tasks such as wiping old user accounts, and built Microsoft Power Automate workflows to trigger automated messages within Microsoft Teams.
- Updated, created, and maintained documentation and workflows to support consistent, repeatable IT operations.

EDUCATION

Durham College

Postgraduate Degree, Computer Systems Technician

Gujarat Technological University (GTU)

Diploma of Education, Computer Engineering

December 2023 – April 2025

Ontario, Canada

September 2019 – June 2022

Gujarat, India
